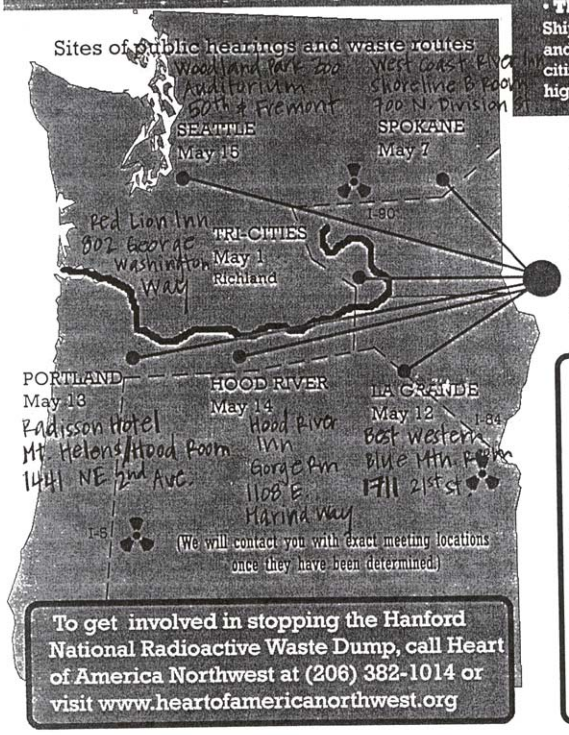
Sites of public hearings and waste routes



To get involved in stopping the Hanford National Radioactive Waste Dump, call Heart of America Northwest at (206) 382-1014 or visit www.heartofamericanorthwest.org

• TRANSPORTATION SAFETY
Shipping 70,000 truckloads of radioactive and chemical waste increases risks to citizens along Oregon and Washington highways.

PUBLIC HEARINGS
will begin at 7:00 PM.

Pre-hearing informational workshops will be held by Heart of America Northwest and other public interest groups beginning at 6:00 PM in Spokane, Portland and Seattle. (Look for our signs at your public hearing location).

Public Participation Threatened: Take Action Now!

USDOE is hastily pursuing its goal to make Hanford a National Radioactive Waste Dump. They have continuously denied requests for an extension on the SWEIS comment period, even though there are over 3,000 pages of text to analyze before public meetings begin.

Come to a meeting! Send in your comments today!

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

Dear Sir:
I have lived my life in Washington State for 59 years and have been listening to information "Clean-Up" on Hanford for over 25 years.
1 Enough is enough — No
No more waste shipments
2 The job should have been completed by now —
I want a good environment for my children

Your participation is needed NOW more than ever.

Fill out the postcard to the left, tear off, affix stamp and mail.

Thank you!

This product was funded through a grant from the Washington State Department of Ecology. While these materials are reviewed for grant consistency, this does not necessarily constitute endorsement by the department.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I urge you to Please take a stand against adding to the already troubled hazardous waste dump at Hanford. Let us focus our efforts towards cleaning up Hanford and reject any plan to bring in more waste. We must be pro active in come up with solutions to lessen the impact of this radioactive waste dump in our beautiful state let alone increase the risks. Remember when Columbia was "the gem of the ocean"!

Our Columbia is one of the GREAT RIVERS of the WORLD!
I cannot comprehend the ignorance and outright crass carelessness that have prevailed at Hanford. (In this "Scientific Age"

1 All these mistakes should be cleared up — not more added!

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

The most desireable situation is to simply end the production of nuclear waste. Is the power generated worth the life-threatening pollution? I say absolutely not!

1 But the reality is that for now anyway, there is nuclear waste. To add this to an already seriously contaminated site & endangered region is not acceptable. We need to spread the waste around... so all regions are contaminated equally

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

I sincerely hope that the lives of my grandchildren and their children will not be threatened by the actions we take today. I think we should be

1 cleaning up Hanford, not burying more radioactive waste. And, let's

2 not endanger ourselves by transporting it on public highways. PLEASE be responsible in your actions.

Dear Mr. Collins, IF USDOE WERE A USED CAR DEALER, I'D SHOP ELSEWHERE.
I would like to express my opinion on the Hanford Solid Waste EIS.
~~Please send me a response to my comment.~~

1 ENOUGH RADIOACTIVE WASTE DUMPED IN WASHINGTON!
2 ENOUGH GROUNDWATER CONTAMINATION!
3 ENOUGH LEAKING CONTAINERS.
4 ENOUGH UNFULFILLED CLEANUP PROMISES!
ENOUGH BUREAUCRATIC DELAYS!
ENOUGH ~~BEAU~~ BUREAUCRATIC FUNDS WASTED ON FEES, NOT CLEANUP!
5 ENOUGH RAIL & HIGHWAY SHIPPING RISKS!
ENOUGH HEAD-IN-THE-SAND ATTITUDE ABOUT EXISTING WASTE!
6 ENOUGH HEALTH AND ENVIRONMENTAL RISKS!
7 ENOUGH TALK & REPORTS, NOT ENOUGH CLEANUP.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I agree with Citizen groups believing a commitment was made by the EPA and USDOE to clean up all soil and groundwater to allow true unrestricted public access to the Hanford Reach by 2018. The recent strategy released by the Tri-Parties does not call for cleaning up groundwater so that this contamination will continue to enter the Columbia River — my family and friends want you to commit!! to groundwater cleanup — for your children's sake and future — FUTURE!!

Please send me a response to my comment.

1 As a parent whose 22 year old son died in 1975 as a down wind victim I urge no more wastes at Hanford.

Currently I ~~work~~ as a historian on on the Queen of the West, Portland to Lewiston, I am aware of concern regarding impact on the food chain.

Please add no more radioactive waste at Hanford

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 Hanford already is the most contaminated site in the country. We here in Washington State and Oregon are greatly concerned about adding more contaminated waste to the area. We are alarmed by the plan to ship 70,000 loads of radioactive waste to Hanford. (truck)

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 The citizens of Washington are committed to the clean-up of Hanford's nuclear waste. Adding more waste will make the job even harder & more costly. There are
2 better ways to handle the waste so that groundwater contamination is avoided.
3 Please plan to bury the waste somewhere closer to its origin – avoiding the dangers inherent in long-distance transport.
Thank you for your prompt consideration.

1 No additional waste should be dumped in the Hanford area — The risk to the inhabitants is TOO GREAT.

2 I own property close to the Hanford Reservation and it is a threat to my health —
When driving thru the area at dusk — The earth gave off a LIGHT ????

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS. STOP !!
Please send me a response to my comment.

1 Stop the Radioactive Waste Dump at Hanford.
We have been subject to the lies at Hanford for 50+ years. We have lived in Wenatchee all our lives - therefore worry about current & future health risks. What about the Columbia River - what about the Ocean! So sad!

I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I do not understand why my government is deliberately try to add to the problems of cleanup at Handford. Why is the government willing to risk human health by contaminating the water of Columbia River?

2 What liability insurance will be taken out by the gov't to pay for tragic accidents along the highways as waste is moved?
