Transportation and Borders

- **The Centers for Disease Control and Prevention will develop criteria and protocols for isolation and quarantine of travelers**

- **In the event of a severe influenza pandemic, domestic travel restrictions could include reductions in non-essential travel, and mandatory restrictions as a last resort.**

- **The Federal Government plans to develop policies in concert with local, State, tribal stakeholders, the private sector, and international partners to address movement of people across U.S. land and maritime borders.**

- **State, local, tribal and private sector entities will be asked to make plans to support development of contingency plans to address lack of critical services and delivery of essential commodities such as:**
  - **Chlorine for water purification**
  - **Gasoline**
  - **Food**
  - **Medical supplies**
