P-0040

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 "Cancer has been rising steadily!!!! Dumping more radioactive waste at Hanford increases risk to human health (and ecological health) from contaminated ground-water. This is a most serious problem. The most recent plan (I was informed) for groundwater clean-up allows contamination to enter the Columbia River for the next 150 yrs.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 DOE's proposal to ship an ~~[illegible]~~ additional 70,000 truckloads of radioactive waste to Hanford poses dangers to the people in Washington and Oregon, to future generations, and to the Columbia River watershed. The EIS should fully reflect these risks and identify other sites as well as mitigation plans for unavoidable damage.

Dear Mr. Collins, 5/3/03

I would like to express my opinion on the Hanford Solid Waste EIS.

1 Please send me a response to my comment. NO DUMP AT HANFORD!

We have worked for 20 years to stop the menace of nuclear in all its many

2 uses and abuses. Hanford's Area has been filthy in a nuclear way as long as it has existed, and yet the D.O.E. has not continued to clean it up properly. In fact, D.O.E. has been the fox guarding the nuclear henhouse. Enough is more than enough! Hanford is not a dumpsite for the nation's waste. End all nuclear industries!

Dear Mr. Collins,

I would like to express my opinion on the Hanford Solid Waste EIS.

Please send me a response to my comment.

IT HAS BEEN VERIFIED THAT RADIO ACTIVE WASTE IS REACHING THE COLUMBIA IN THE FORM OF CONTAMINATED GROUND WATER.

1 PLEASE STOP BRINGING MORE WASTE TO THIS STATE. WE ARE ALREADY POLLUTED ENOUGH. AND THE ONCE MIGHTY COLUMBIA IS ONCE AGAIN DEPRIVED OF HER TRUE HERITAGE. THE LATEST HANFORD SOLID WASTE ENVIRONMENTAL IMPACT STATEMENT (SWEIS) STILL FAILS THE GRADE.

THANK YOU,

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

It's difficult for me to write this card without intejecting insults and invective aimed at the DOE
1 and any perpetrators of these patently insane plans to 70,000 tons of radioactive materials anywhere, much less to Hanford. How many years has it been since Hanford
2 was delared a superfund site & it would be "cleaned up," a daunting project under the best of conditions? I don't know about you, dear Reader, but I have made a point to research effects of radioactivity on living systems. Any sane person who has wouldn't give this latest DOE plan an iota of credibility.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 Please make them stop adding anything more to Hanford (& other areas in WA state). Our previous Governor, Dixie Lee Ray, lied to my Mom in a public meeting in the 70s about the safety of the storage system back then.
2 People assume they will fix problems as they emerge (which is true in many fields) but so many problems have "emerged" at Hanford credibility is shot as carrying capacity is exceeded.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 Stop the Hanford National Radioactive Waste Dump! Hanford is already the most contaminated site in the U.S. The government has not been able to safely contain or clean-up the waste already at Hanford — more waste will not help us to
2 do so. The health of our people + our environment is already being very adversely affected by
3 waste leakage. The SWEIS has not addressed the concerns of intelligent citizens even
4 close to adequately! Do not allow more waste to be shipped to Hanford! Thank you.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I am strongly opposed to The VDOE's plan to make Hanford the National Radioactive Waste Dump. Oregon + Washington will be at increased risk of radioactive contamination, especially in regards to the Columbia River + local groundwater.

2 Hanford Clean-Up has been inadequate to date. Please reconsider your selection.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I am in favor of using the Hanford Reservation as a temporary storage facility for spent nuclear residue and nuclear waste.

The opposition to this program is not based on hard evidence and common sense. They imply that the nuclear waste will be dumped haphazardly and the whole process will be unprofessional

I trust that you will do it right.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

The plan to site a radioactive waste dump at Hanford is ill conceived. Hanford is already the nation's most contaminated site.
1 Promised cleanup have not happened.
The Columbia River is at great risk. This dump would increase the
2 danger. Please extend the SWEIS
3 comment period. We need a proper SWEIS. Thank you

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

This government has not kept faith - clean-up @ Hanford is way below par.
1 Do NOT send more radio active waste to Hanford until a thorough clean-up has been done + a safe - truly safe - plan + system + the finances required for that has been adopted + shown to us citizens

Sincerely,

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 At a time when Hanford is slowly being cleaned after decades of neglect, I don't feel it is appropriate to ship highly toxic/radioactive waste to the site. In addition, I am concerned about accidents during transport that would threaten the public.

1 Stop the production - Keep it simple + Mother Earth friendly.
Do Bush, Chaney, Powell, Rice, Rumsfeldt have polution deposits in their backyard? Correct spelling doesn't mean a thing to me, but contamination over beautiful home - the earth does.

2 What sense comes from seeping contaminants into purity?

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I want the US government to stop using Hanford as a national radioactive waste dump.
I have major concerns that this site does not guarantee safety against the environmental and health risks.

2 Hanford is already the nation's most contaminated site. I fear for the safety and viability of the Columbia River.

3 And the shipping of radioactive waste along highways increases risk to citizens.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I believe Washington State at Hanford has received more than its share of Radio active waste. Hanford is the Nations most contaminated site, more waste increases the risk to health from contamination of the Columbia river. Shipping truckloads of radioactive and chemical waste increases risks to residents along Oregon and Washington Highways.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 With fish and other living (people crops, etc) things depending upon the Columbia river water - it would seem to me to immediately stop any further errosion of the protection of the radio-active waste from polluting the Columbia. Already it is proved it is leaking into the Columbia - what a stupid place to put a radio-active waste site. Stop it NOW!
