
Legend

- Wells and Test Holes Completed by Caithness
- Other Wells
- Springs
- Approximate Limit of Big Sandy River Alluvium
- Predicted Drawdown in Feet
- Approximate Extent of Perennial Flow in the Big Sandy River Under Base-Flow conditions

Project Components

Pipeline Corridor Segments
Proposed Pipeline Corridor - R1, C1, T3, C3, T4,R5
Alternative R Corridor - R1, R2, R3, C3, R4, R5
Alternative T Corridor - T1, T2 T3, C3, T4, T5

N

0 0.5 1
Scale in Miles

Universal Transverse Mercator Projection
1927 North American Datum
Zone 12

Predicted Drawdown in the Upper Aquifer After 40 Years of Pumping - Aquitard Hydraulic Conductivity of 4 x 10^{-5} ft/d (Worst Case)
