APPENDIX K: DISTRIBUTION LIST, INTERGOVERNMENTAL AFFAIRS AND AGENCY CONSULTATIONS

Council on Environmental Quality (CEQ) Regulations (40 CFR §1506.6) implementing the *National Environmental Policy Act* (NEPA) compel public participation and involvement in the environmental impact statement (EIS) process. Further, U.S. Department of Energy (DOE) guidelines (10 CFR Part 1021) for implementing NEPA stipulate requirements of public notices during the EIS process. These guidelines also describe the requirements for a formal public hearing and comment period after the release of the *Site-wide Environmental Impact Statement for Continued Operation of Lawrence Livermore National Laboratory and Supplemental Stockpile Stewardship and Management Programmatic Environmental Impact Statement* (LLNL SW/SPEIS).

In addition, the EIS process includes intergovernmental affairs activities designed to keep government agencies and officials informed of the issues and the status of the LLNL SW/SPEIS. These activities include opportunities to participate in the scoping process, consultations during data collection, and opportunities to comment on the Draft LLNL SW/SPEIS.

K.2 INTERGOVERNMENTAL AFFAIRS AND AGENCY CONSULTATIONS

Intergovernmental affairs activities are designed to keep relevant government agencies and officials informed of the issues and progress of the LLNL SW/SPEIS. Activities include requests for comments on draft documents and discussions with government agencies and officials throughout the process.

NEPA requires that Federal, state, and local agencies with legal jurisdiction or special expertise regarding any environmental impact be consulted and involved in the LLNL SW/SPEIS process. This involvement ensures that a variety of perspectives are represented. Agencies involved include those with authority to issue applicable permits, licenses, and other regulatory approvals, as well as those responsible for protecting significant resources (e.g., endangered species, critical habitats, or historic resources). This section includes consultation letters between NNSA, the U.S. Department of Interior, U.S. Fish and Wildlife Service, and the California Department of Fish and Game regarding threatened and endangered species, tribal organizations regarding Native American heritage resources, and other state agencies as needed.
