

LIST OF TABLES

<u>Table</u>		<u>Page</u>
2-1	Alternative Waste Management Strategies	2-7
2-2	EIS Decisions and NEPA Documentation	2-11
2-3	Solid and Low-Level Radioactive Waste Sites	2-13
2-4	Existing Waste Sites by Geographic Grouping	2-17
2-5	No Action Strategy - Existing Waste Site Program Modifications for No Action	2-22
2-6	Dedication Strategy - Existing Waste Site Program Modifications for No Removal of Waste and Implementation of Cost-Effective Remedial and Closure Actions as Required . .	2-24
2-7	Elimination Strategy - Existing Waste Site Program Modifications for Removal of Waste to the Extent Practicable from All Sites, and Implementation of Cost- Effective Remedial and Closure Actions as Required	2-28
2-8	Combination Strategy - Existing Waste Site Program Modifications for Removal of Waste to the Extent Practicable from Selected Sites, and Implementation of Cost-Effective Remedial and Closure Actions Required	2-32
2-9	NOI Alternatives and Corresponding Technologies	2-36
2-10	Estimated Range of Hazardous, Mixed, and Low-Level Radioactive Waste Volumes	2-45
2-11	New Disposal/Storage Facility Alternatives	2-46
2-12	Comparison of Alternative Waste Management Strategies	2-52
2-13	Comparison of Project-Specific Actions - New Disposal Facilities	2-60
2-14	Comparison of Project-Specific Actions - Discharge of Disassembly-Basin Purge Water	2-63
3-1	1980 Population for Counties and Places of 1000 Persons or More	3-5
3-2	Average Monthly Wind Speed for Bush Field, Augusta, Georgia, 1951-1981, and WJBF-TV Tower, 1976-1977	3-9
3-3	Precipitation at Savannah River Plant, 1952-1982	3-9
3-4	Extreme Wind Speeds for SRP Area (meters per second)	3-10
3-5	Tornado Occurrence by Month	3-11
3-6	Hydraulic Conductivity of the Ellenton Formation	3-19
3-7	Average Chemical Analysis of Groundwater From Coastal Plain Formations at the Savannah River Plant	3-24
3-8	Summary of SRP Groundwater Monitoring Data	3-26
3-9	SRP Groundwater Monitoring Data - Radiological Constituents . .	3-28
3-10	Mean Water Chemistry of Upper Three Runs Creek and Tims Branch, 1983-1985	3-36
3-11	Mean Water Chemistry of Four Mile Creek, 1983-1985	3-37
3-12	Mean Water Chemistry of Beaver Dam Creek, 1983-1985	3-39
3-13	Mean Water Chemistry of Indian Grave Branch and Pen Branch, 1983-1985	3-40
3-14	Mean Water Chemistry of Meyers Branch and Steel Creek, 1983-1985	3-42
3-15	Mean Water Chemistry of Par Pond and Lower Three Runs Creek, 1983-1985	3-44
3-16	Land Utilization, 1983	3-45

<u>Table</u>		<u>Page</u>
3-17	Common and Scientific Names for Selected Biota on the SRP . . .	3-47
3-18	Major Sources of Radiation Exposure in the Vicinity of the SRP	3-52
3-19	Atmospheric Releases and Concentrations at SRP Perimeter, 1986	3-53
3-20	Air Monitoring Station Radiation Measurements, 1986	3-55
3-21	Tritium Concentrations in Drinking Water from Onsite and Offsite Deep Wells, 1984-1986	3-57
3-22	Alpha Concentrations in Drinking Water from Onsite and Offsite Deep Wells, 1984-1986	3-58
3-23	Nonvolatile Beta Concentrations in Drinking Water from Onsite and Offsite Deep Wells, 1984-1986	3-59
3-24	Liquid Releases and Concentrations for 1986	3-60
3-25	Radioactivity in Onsite Streams	3-61
3-26	Radioactivity Deposited in Soil, 1986	3-62
3-27	Fenced/Unfenced SRP Waste Sites	3-67
4-1	Common Risks	4-6
4-2	Additional Groundwater Monitoring Wells	4-8
4-3	Peak Concentrations at 100-Meter Well for No Action, A- and M-Areas	4-9
4-4	Peak Concentrations at 100-Meter Well for No Action, F- and H-Areas	4-11
4-5	Peak Concentrations at 100-Meter Wells for No Action, R-Area	4-12
4-6	Peak Concentrations at 100-Meter Well for No Action, C-Area and Central Shops	4-14
4-7	Peak Concentrations at 100-Meter Well for No Action, TNX-Area .	4-15
4-8	Peak Concentrations at 100-Meter Well for No Action, K-Area . .	4-17
4-9	Peak Concentrations at 100-Meter Well for No Action, L-Area . .	4-18
4-10	Peak Concentrations at 100-Meter Well for No Action, P-Area . .	4-19
4-11	Waste Constituents in Surface Water for No Action	4-20
4-12	Peak Annual Doses to Maximally Exposed Individual from Radiological Releases for No Action	4-22
4-13	Radiological Health Risks to the Maximally Exposed Individual from the Peak Annual Doses for No Action	4-23
4-14	Total Noncarcinogenic Risks for No-Action, Groundwater/ Surface-Water Pathway in Each Geographic Grouping	4-25
4-15	Total Nonradiological Carcinogenic Risks for No Action, Groundwater/Surface-Water Pathway in Each Geographic Grouping	4-26
4-16	Risks to the Population and the Maximally Exposed Individual Attributable to Atmospheric Nonradiological Carcinogens for No Action	4-29
4-17	Basin Liquid Disposal Methods	4-35
4-18	Waste Sites Assumed to be Capped with Low-Permeability Barriers	4-36
4-19	Peak Concentrations for Dedication Strategy, A- and M-Area . .	4-38
4-20	Peak Concentrations for Dedication Strategy, F- and H-Area . .	4-39
4-21	Peak Concentrations for Dedication Strategy, R-Area	4-42
4-22	Peak Concentrations for Dedication Strategy, C- and CS-Areas	4-43
4-23	Peak Concentrations for Dedication Strategy, TNX-Area	4-44

<u>Table</u>	<u>Page</u>	
4-24	Peak Concentrations for Dedication Strategy, K-Area	4-46
4-25	Peak Concentrations for Dedication Strategy, L-Area	4-47
4-26	Peak Concentrations for Dedication Strategy, P-Area	4-49
4-27	Peak Annual Doses to the Maximally Exposed Individual from Radiological Releases for the Dedication Strategy	4-50
4-28	Radiological Health Risks to Maximally Exposed Individual from the Peak Annual Doses for the Dedication Strategy	4-51
4-29	Total Nonradiological Carcinogenic Risks for Dedication Strategy, Groundwater/Surface-Water Pathway in Each Geographic Grouping	4-52
4-30	Total Noncarcinogenic Risks for Dedication Strategy, Groundwater/Surface-Water Pathway in Each Geographic Grouping	4-53
4-31	Risks to Population and Maximally Exposed Individual Attributable to Atmospheric Nonradiological Carcinogens for Dedication Strategy	4-55
4-32	Elimination Strategy Excavation and Transport Requirements	4-59
4-33	Excavated Waste Sites Assumed to be Capped with Low Permeability Barrier	4-61
4-34	Peak Concentrations for the Elimination Strategy, A- and M-Areas	4-62
4-35	Peak Concentrations for the Elimination Strategy, F- and H-Areas	4-63
4-36	Peak Concentrations for Elimination Strategy, R-Area	4-65
4-37	Peak Annual Dose to Maximally Exposed Individual and Years of Occurrence for Elimination Strategy	4-66
4-38	Radiological Health Risks to Maximally Exposed Individual from the Peak Annual Dose for Elimination Strategy	4-68
4-39	Total Nonradiological Carcinogenic Risks for Elimination Strategy, Groundwater/Surface-Water Pathway in Each Geographic Grouping	4-69
4-40	Total Noncarcinogenic Risks for Elimination Strategy, Groundwater/Surface-Water Pathway in Each Geographic Grouping	4-70
4-41	Risks to Population and Maximally Exposed Individual Attributable to Atmospherically Released Nonradiological Carcinogens for Elimination Strategy	4-72
4-42	Combination Strategy - Sites Selected for Waste Removal	4-77
4-43	Existing Waste Site Impacts for Each Waste Management Strategy	4-83
4-44	Basis for New Waste Management Facility Impact Evaluations	4-89
4-45	New Waste Management Facility Impacts for Each Waste Management Strategy	4-100
4-46	Predicted Tritium Discharge from Reactor Disassembly Basins	4-103
4-47	Annual and Cumulative Discharges for Non-tritium Radionuclides from Reactor Disassembly Basins (Ci)	4-103
4-48	Tritium Releases to Environment Associated with the No-Action Strategy	4-105
4-49	Highest Annual and Average Annual EWBD Associated with the No-Action Strategy	4-105
4-50	Tritium Releases to Environment Associated with the Elimination Strategy (Evaporation)	4-106

<u>Table</u>	<u>Page</u>	
4-51	Highest Annual and Average Annual EWBDs Associated with the Elimination Strategy (Evaporation)	4-107
4-52	Tritium Releases to Environment Associated with the Elimination Strategy (Direct Discharge)	4-108
4-53	Maximum and Average Annual EWBDs Associated with the Elimination Strategy (Direct Discharge)	4-108
4-54	Average Annual EWBD to the Maximally Exposed Individual for Each Strategy (mrem/yr)	4-110
4-55	Closure Accidents	4-114
4-56	Accident Risks for No Action	4-116
4-57	Accident Risks for No-Waste-Removal and Closure	4-117
4-58	Accident Risks for Complete Waste Removal and Closure	4-118
4-59	Accident Risks for Waste Removal and Closure at Selected Sites	4-119
4-60	RCRA and CERCLA Sites in South Carolina	4-121
4-61	Collective Cumulative Health Effects Atmospheric and Liquid Releases for Alternative Actions at Existing Waste Sites	4-128
4-62	Collective Cumulative Health Effects from Atmospheric and Liquid Releases for Alternative Actions for Disassembly-Basin Purge Water Discharge	4-129
4-63	Carcinogenic Risks for Groundwater and Surface-Water Exposure (Elimination Strategy)	4-129
4-64	Carcinogenic Risks for Groundwater and Surface-Water Exposure (No-Action Strategy)	4-130
5-1	South Carolina Hazardous Waste Management Regulations: Groundwater-Monitoring Analyses	5-3
5-2	Existing Waste Sites Availability of Groundwater Monitoring and Soil Sampling Data	5-6
6-1	Compliance of SRP Interim-Status Facilities With 1984 Hazardous and Solid Waste Amendments	6-7
6-2	Regulations Applicable to SRP Waste Management Facilities	6-10
