

P-0128

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I have expressed my opinion
before. We must clean up the present
dangerous waste now residing at Hanford,
polluting the land and Columbia River. Also,
2 no more radioactive waste should be
stored there. No one who lives close to such
a storage place would welcome it, but Hanford
is in such a dangerous area with the river
and Hanford Beach so close, which is such a sensitive area.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 Please do not continue to compound a
terrible inadequate waste storage
problem at Hanford with even
more nuclear waste. I am well
aware of the leakage of plutonium --
extremely carcinogenic -- and carbon
14 -- a known carcinogen -- into
the ground water & the Columbia
2 River. Obviously, the importation
process itself is a potentially
dangerous as well.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 The contents already existing at Hanford
are enough of a hazard to ^{our} environment.
I would like to see real efforts (not
promises) in cleaning up this poorly
handled and dangerous site and not
add more to the problem.

Please consider your options with care,
there is much at stake here.

Thank you,
Nancy Klein

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

Dear Michael Collins:
What an amazing thing it is that I should have
to write to you again.

1 Please clean up and close down Hanford once
and for all.

2 There are several viable alternatives to destructive
energy schemes. You know as well as anyone that
the only reason for using the worst one, nuclear, is
because it puts the most possible money into the fewest
possible hands.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I understand from all reports on TV & in papers (newspapers) etc., that Hanford is already one of the most polluted sites on planet Earth. How can you dare add more contaminated material? You will have to answer to someone someday be it a higher authority, the general public, a court inquiry, a senate investigation, etc. CAN YOU HAVE A GOOD ANSWER?

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 The Revised Draft EIS indicates that the USDOE Plans to send more solid wastes to Hanford. Although it is commendable that you will send the wastes to a national repository eventually, it is not logical to add more wastes to Hanford until after you have removed what is already there.

2 Also, trucking wastes to Hanford and then eventually shipping them out again poses a double hazard of transportation.

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 Nuclear waste is destroying the cells of all of nature
in obvious and incidious ways. We must prevent
the further contamination of the Columbia River
by rapidly and safely containing the current
accumulation and stopping the importation of waste
from other sources. Radioactive waste could end
the human race!

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 I lived in Richland, WA. for 2 years, taught
kids in a local school - I was shocked and
dismayed at the number of ill, seriously
affected unhealthy children and adults living
there, well-educated intelligent, sick people!
2 Please stop this waste dump! The Columbia
River is threatened by radioactive waste,
3 peoples lives, jobs, are threatened!
4 No more waste to Hanford! Stop Now

Dear Mr. Collins,
I would like to express my opinion on the Hanford Solid Waste EIS.
Please send me a response to my comment.

1 Washington state is the most beautiful state
in America. Thus, it broke my heart that
the USDOE plan to ship 70,000 truckloads of
Radioactive waste to Hanford. Please don't let
this happen. With Hanford not cleaned up 58 years
2 after the end of World War II, think of the
irreplaceable damage this EIS will further do
to the great Columbia river, the Indians who
fish on it, and the damage to the ecology
of the state of Wash. Would you like that
happening to Wash or your home state?
