

11. INDEX

	-A-				
Accident analysis		1-21		public occupational health and safety, accidents	5-76
Accident scenarios		D-1		public occupational health and safety, normal operations	5-69
Affected environment		4-1		radiation environment	4-88
ALOHA computer code		D-40		regional economic characteristics	4-76, 5-60, 5-66
Alternative reactor facilities		1-4		regulatory compliance history	6-18
APT alternative		1-1, 1-22		resources required to complete construction	3-24
APT construction impacts		5-114		seismology	4-68
APT EIS		1-2, 1-12, 1-13, 5-114		socioeconomics	4-76, 5-57
APT operational impacts		5-115		soils	4-68, 5-50
Asia Brown-Boveri		-11, 5-103		spent nuclear fuel storage capacity	4-89
Atomic Energy Act		1-18, 2-1, 6-3		spent nuclear fuel management	4-89, 5-85
	-B-			surface water quality	4-64
Babcock & Wilcox		3-2		surface water use and rights	4-65
Baseline configuration		5-109		surface water	4-64, 5-43
Bellefonte				tax revenues	4-84, 5-60, 5-66
affected environment		4-57		terrestrial resources	4-68, 5-52, 5-53
air quality		4-62, 5-36		terrestrial wildlife	4-69, 5-52, 5-53
aquatic resources		4-70, 5-52, 5-54		threatened and endangered species	4-73, 5-52, 5-55
archaeological and historic resources		4-75, 5-51, 5-56		visual resources	4-61, 5-32
chemical environment		4-88		waste management	4-88, 5-83
community services		4-81, 5-60, 5-66		wetlands	4-69, 5-52, 5-55
completion requirements		3-22		Beyond design-basis accidents	D-8, D-34
conversion project EIS		1-14		Boosting	1-8
cumulative impacts		5-122		Burnable absorber rods	3-2
electromagnetic field health effects		5-75		BWX Technologies	3-11, 5-103
environmental justice		5-82, G-10			
fission product core inventories		D-14		-C-	
floodplains and flood risk		4-67, 5-49		Carbon dioxide emissions	5-117
gaseous radioactive emissions		4-62, 5-42		CEQ Regulations	1-6, 1-18
general design specifications		3-24		Chemical accident analysis methodology	D-39
geology		4-68, 5-50		Chemical accident scenarios	D-37, D-38
groundwater		4-67, 5-48		Clean Air Act	6-3
hazardous waste		5-84		Clean Water Act	6-4
housing		4-81, 5-59, 5-65		Commercial light water reactors	A-5
land use		4-58, 5-31		Comparison of alternatives	3-25
liquid chemical and radioactive effluents		4-66		Comparison of CLWR and APT, summary	3-40
local transportation		4-84, 5-63, 5-69		Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)	6-8
location, map		4-59		Comprehensive Test Ban Treaty	1-6, 1-8
low-level radioactive waste		5-85		Cost-effectiveness	1-17
meteorology and climatology		4-62		Critical chain reaction	A-3
mixed waste		5-85		Crud	E-24
noise		4-61, 5-33		Cumulative impacts	5-119
NPDES permit		3-25		Decontamination and decommissioning	3-9, 5-90, 5-91
Nuclear Plant		3-20		Defense program mission	1-6
permit to construct		3-22			
population		4-78, 5-59, 5-65			
public and occupational health and safety, chemical impacts		5-72, 5-80			

DOE past practices	1-19	ISFSI accidents	5-100
		ISFSI construction	5-94
	-E-	ISFSI operation	5-97
Economy Act	1-4	Large break loss-of-coolant accident	D-21
Electric power generation	3-1	<i>Lead Test Assembly Environmental Assessment</i>	1-12,1-13
Emergency planning	6-8	Lead Test Assembly Demonstration Project	1-13, 5-113
Endangered Species Act	6-6	Licensing renewal	3-9, 5-85
Energy Vision 2000	1-11	Lithium-6	3-2, 5-103, A-17
Environmental consequences, assumptions	5-2	Long-term productivity	5-129
Environmental consequences, methodology	5-1, B-1		-M-
Environmental justice	1-21, 6-7, G-1, G-2	MACCS2 computer code	D-16
Environmental Protection Permits	6-3	Mitigation Action Plan	5-130
Evensville, Tennessee	1-17	Mitigation measures	1-22, 5-130
Exposure pathways	C-5		-N-
	-F-		
Federal Facility Compliance Act	6-5	National Ambient Air Quality Standards	6-4
Final EIS for Bellefonte Conversion	3-22	National Defense Authorization Act	1-10
<i>Final Programmatic Environmental Impact Statement for Tritium Supply and Recycling</i>	1-2, 1-12, 3-8	National Emission Standards for Hazardous Air Pollutants Program	6-4
<i>Final Programmatic Environmental Impact Statement for Tritium Supply and Recycling, Record of Decision</i>	1-2	National Environmental Policy Act	1-1, 6-6
Floodplain management	6-6	National Historic Preservation Act	6-7
Framatome-Cogema	3-11, 3-103	National Pollutants Discharge Elimination System Program	6-4
Fuel assembly	3-4, A-9	NEPA process	1-18, 1-19
	-G-	NEPA strategy	1-12
		Nickel-plated zircaloy	A-19
		No Action Alternative	1-1, 3-9, 3-13, 3-26, 5-114
General Electric Company	3-11, 3-103	Noninvolved workers	D-41
GENII computer code	C-13	Nonreactor design-basis accidents	D-3, D-26
Getter	1-9, 3-2, A-19	Nontarget-bearing components	E-24
	-H-	North Augusta, Georgia	1-17
		Nuclear fission	A-1, A-2
Hazardous chemicals impacts	C-23	Nuclear fusion	1-8
Health effect risk factors	C-9	Nuclear Nonproliferation	1-9
Highly Enriched Uranium, blending down	5-105	Nuclear Nonproliferation Treaty	1-9, 1-10, 5-112
Highly Enriched Uranium EIS	5-105	Nuclear reaction	A-2
HIGHWAY computer code	E-10	Nuclear weapons	1-6, 1-8
	-I-	Nuclear Weapons Stockpile Memorandum	1-6, 2-1
		Nuclear Weapons Stockpile Plan	1-6,1-9, 1-18, 2-1, 2-2, 5-112
IAEA safeguards	1-10		-O-
Independent Spent Fuel Storage Installation (ISFSI)	3-10, 5-93	Occupational Safety and Health Act	6-9
Industrial facilities, Jackson County	5-122		-P-
<i>Interagency Review of the Nonproliferation Implications of Alternative Tritium Production</i>	1-10,1-18	Planning assumptions for the CLWR EIS	3-8
INTERLINE computer code	E-10	Pollution Prevention Act	6-7
Involved workers	5-117	Population projections	G-3
Irreversible and irretrievable commitments of resources	5-129	Preferred Alternative	1-13, 3-30
		Presidential Decision Directive	1-6,1-8, 5-112

Pressurized water reactors	3-2, 3-3, A-6	emergency preparedness	4-54
Procurement process	1-2	environmental justice	5-29, G-8
Proposed action	1-2	fission product core inventories	D-11
Protection and Enhancement of Environmental Quality	6-6	floodplains and flood risk	4-40
Protection of Wetlands	6-6	gaseous emissions	3-20
Public and occupational health and safety	1-19	gaseous radioactive emissions	4-36, 5-18
Public comment period	1-16	general design specifications	3-17
Public hearings	1-17	geology	4-41, 5-20
Public scoping meetings	1-15	groundwater	4-40, 5-19
Public scoping process	1-15, F-1	groundwater availability use and rights	4-41
Purpose and need for tritium	2-1	hazardous waste	4-55
		land use	4-31, 5-17
		liquid chemical and radioactive effluents	4-40, 5-19
-R-		liquid effluent releases	3-19
Radiation	C-2	local transportation	4-50
Radiation exposure assumptions	C-14, C-15	location, map	4-32
Radiation exposure limits	C-6	low-level radioactive waste	4-55
Radiation exposure uncertainties	C-18	meteorology and climatology	4-37
Radiation health effects	C-7	mixed waste	4-56
Radiation measures	C-3	noise	4-34, 5-17
Radiation protection guides	C-6	NPDES permit	3-19
Radiation sources	C-4	Nuclear Plant	3-17
Radiological accident impacts	D-1	public and occupational health and safety, normal operations	5-23
Radiological impacts (all sites)	C-21	public and occupational health and safety, accidents	5-26
Radiological releases (all sites)	C-19	radiation environment	4-52
RADTRAN4 computer code	E-12	regional income	4-48
Rainsville, Alabama	1-17	regulatory compliance history	6-14
Reactor accident analysis assumptions	D-18	seismology	4-41
Reactor coolant system	A-7	socioeconomics	4-47, 5-22
Reactor design-basis accidents	D-2, D-26	soils	4-41, 5-20
Reactor facility alternatives	3-11	spent nuclear fuel generation	3-20
Reactor operating cycle	5-111	spent nuclear fuel management	4-56, 4-57, 5-30
Reactor refueling	A-12	spent nuclear fuel storage capacity	4-57
Reasonable alternatives	3-11, 3-12	surface water	4-38, 5-19
Regulatory compliance history	6-9	surface water use and rights	4-39
Regulatory limits of radiation exposure	6-3	terrestrial resources	4-42, 5-21
Resource commitments	5-128	terrestrial wildlife	4-42, 5-21
Resource Conservation and Recovery Act (RCRA)	6-5	threatened and endangered species	4-45, 5-21
		visual resources	4-34, 5-17
-S-		waste generation	3-20
Safe Drinking Water Act	6-5	waste management	4-55, 5-30
Safeguards and security	1-20, 5-113	waste minimization practices	4-56
Secondary impacts of facility accidents	5-118	wetlands	4-42, 5-21
Sensitivity analysis	1-22, 5-107	Severe reactor accidents	D-8
Separation of civilian and military programs	1-18	Short-term uses	5-129
Sequoyah affected environment	4-30	Siemens Power Corporation	3-11, 5-103
air quality	4-34, 5-8	Spent nuclear fuel storage	5-93
aquatic resources	4-42, 5-21	Spent nuclear fuel generation	1-19, 3-10
archaeological and historic resources	4-46, 5-22	Strategic Arms Reduction Treaty (START)	1-10, 2-2, 5-112
chemical environment	4-54	Systematic Assessment of Licensee Performance (SALP)	6-14
community services	4-50		
cumulative impacts	5-120		
demography	4-47		

-T-		archaeological and historic resources	4-19, 5-8
Technology announcement	1-2, 1-6, 1-13, 1-19, 1-20, 3-13	chemical environment	4-27
Tennessee Valley Authority (TVA)	1-11	community services	4-23
TPBAR fabrication	5-103	cumulative impacts	5-119
TPBAR failures	1-20, 5-11, 5-25, 5-72	demography	4-20
TPBAR handling	A-21	emergency preparedness	4-27
TPBAR handling accidents	D-4, D-31	environmental justice	5-15, G-4
TPBAR transportation	5-105, 5-124, E-1	fission product core inventories	D-11
Transportation accidents	E-18	floodplains and flood risk	4-13
Transportation analysis assumptions	E-12, E-21	gaseous emissions	3-16
Transportation analysis conservatism	E-33	gaseous radioactive emissions	4-9, 5-4
Transportation analysis uncertainties	E-33	general design specifications	3-13
Transportation cask handling accidents	D-5, D-6, D-32, D-33	geology	4-14, 5-7
Transportation environmental justice	G-14	groundwater	4-13, 5-5
Transportation long-term impacts	E-32	groundwater availability use and rights	4-14
Transportation of hazardous materials	6-8	hazardous waste	4-28
Transportation of low-level radioactive waste	E-17	land use	4-3, 5-3
Transportation regulations	E-7	liquid chemical and radioactive effluent	4-13, 5-5
Transportation risk analysis results	E-26	liquid effluent releases	3-15
Transportation risks methodology	E-10	local transportation	4-23
Transportation routes selection	E-9	location, map	4-4
Tritiated water	C-11	low-level radioactive waste	4-28
Tritium	1-1	meteorology and climatology	4-9,
Tritium biological properties	C-10	mixed waste	4-29
Tritium extraction facility impacts	5-125	noise	4-6, 5-4
Tritium Extraction Facility EIS	1-12, 1-14, 5-124	NPDES permit	3-15
<i>Tritium Facility Modernization and Consolidation Project Environmental Assessment</i>	1-14	Nuclear Plant	3-13
Tritium genetic effects	C-12	public and occupational health and safety, accident	5-12
Tritium need	2-1, 3-8	public and occupational health and safety, normal operation	5-9
Tritium producing burnable absorber rods (TPBARs)	3-2, 3-5, 3-6, A-17, A-20, A-21	radiation environment	4-24
Tritium production design limit	5-107, 5-111	regional income	4-23
Tritium production impacts summary	3-26, 3-31	regulatory compliance history	6-11
Tritium project duration	3-9	seismology	4-14
Tritium requirements and supply	1-21	socioeconomics	4-20, 5-8
Tritium reserves	2-2	soils	4-15, 5-7
TVA mission	2-3	spent nuclear fuel generation	3-16
TVA proposals	1-2, 1-4	spent nuclear fuel management	4-29, 4-30, 5-16
Type B transportation casks	E-3	spent nuclear fuel storage capacity	4-30
-U-		surface water quality	4-12
Unavoidable adverse impacts	5-128	surface water use and rights	4-12
-W-		surface water	4-10, 5-5
Warhead	1-8	terrestrial resources	4-15, 5-7
Waste gas decay tank accident	D-24	terrestrial wildlife	4-15, 5-7
Water quality analysis	1-21	threatened and endangered species	4-18, 5-7
Watts Bar		visual resources	4-6, 5-3
affected environment	4-2	waste generation	3-16
air quality	4-7, 5-4	waste minimization practices	4-29
aquatic resources	4-17, 5-7	waste management	4-28, 5-16
		wetlands	4-15, 5-7
		Westinghouse Electric Corporation	3-11, 3-13, 5-103
