Subject: National Security Complex

Dear U.S. DOE:  
My family and i are for spending \$4 billion on the National Security Complex in Oak Ridge, Tenn. Our national security is at an all time low, and the Clinton Gore Administration has put us in the cold war situation again. We and our children are looking down the noses of nuclear missiles in China, and Russia again plus there are those mid-east countries are building a nuclear arsenal at record pace.  
The radical environmentalists don't know danger when they see it. All they want is the whole world for themselves. Notice i called them Radical Environmentalists. I am an environmentalist myself. I believe in a sensible environment such as clean rivers, clean roadsides, the non dumping of toxic waste onto the ground, or in the rivers, and streams, and taking old batteries to places that collect them, and dispose of them correctly, and many other things.  
So i say build the National Security Complex
